

Specifications for Polyamide Resin (PA Resin)

Parameter	Value
Molecular Formula	--
Mol Wt	--
CAS #	[68410-23-1]
Description	Bright pale golden color granules
Softening point (ball and ring) in deg cel	106-111
Acid value (mg KOH/g)	2 -5
Amine value	2 - 5
Viscosity at 30 deg cel (B4 cup) in poise at 35% solid in polar solvents	1.0 – 1.5

Uses

Industry	Application
Ink	As binders / resins in NC-PA based gravure and flexographic printing inks
Adhesives	As resin in hot melt adhesives
Coatings	As resin in heat seal coatings
