

## Specifications for Polyester Polyol

| Parameter                      | Value                   |
|--------------------------------|-------------------------|
| Molecular Formula              | --                      |
| Mol Wt                         | --                      |
| CAS #                          | --                      |
| Description                    | Clear Colourless liquid |
| Hydroxyl #                     | 420 – 450               |
| Acid #                         | 1.5 max                 |
| Colour (APHA)                  | 250 max                 |
| Moisture in ppm                | Report                  |
| Viscosity at 25 deg cel in cps | Report                  |

## Uses

| Industry   | Application   |
|------------|---|
| Polymer    | In mfr of PolyU foams<br>In mfr of cast elastomers<br>In curing of epoxy resins |
| Adhesives  | As resin / hardener   |
| Coatings   | As resin in paint formulations cured by radiation                               |
| Colourants | In pigment dispersions  |
| Textile    | In mfr of textile foams   |
