

## Specifications for n-Propyl acetate

| Parameter                     | Value                   |
|-------------------------------|-------------------------|
| Molecular Formula             | C5H10O2                 |
| Mol Wt                        | 102.13                  |
| CAS #                         | [109-60-4]              |
| Description                   | Clear colourless liquid |
| Assay                         | 99.0% min               |
| Distillation range in deg cel | 102.0 ± 1               |
| Sp Gravity at 27/27 deg cel   | 0.885 -0.890            |
| Acidity as acetic acid (%)    | Report                  |
| KF Water (%)                  | 0.1 max                 |
| Flash point in deg cel        | 10                      |

## Uses

| Industry  | Application            |
|-----------|------------------------|
| Pharma    | As solvent             |
| Coatings  | As solvent and thinner |
| Cosmetics | In formulations        |
| Adhesives | As thinner             |
